Becker Acroma

Beckry™

100% UV Finishing Products

Beckry is a highly flexible UV product line, designed to be combined and used with other types of finishing products to create a system optimized around a finisher's unique application and aesthetic needs. With a range of products and qualities, it is easy for manufacturers to achieve their perfect system regardless of end-use.

Beckry UV Finishing Product Features

- 100% Solids UV
- Vacuum, Automated Spray and Rollcoat Application Formulations
- Delivers Superior Flow and Leveling
- Clear Finishes Have Excellent Clarity
- Formaldehyde Hazard Free
- Excellent for Furniture & Joinery, Kitchen & Bath and Millwork Wood Substrates

Beckry Clear 100% UV

Beckry Clear is a 100% solids, formaldehyde hazard free, UV curable coating formulated for Vacuum Coat, Automated Spray Machine and Rollcoat applications. The excellent clarity and outstanding flow properties help finishers achieve a superior appearance on furniture, joinery, and millwork. Formulated for superior durability, Beckry Clear provides outstanding resistance to UV light and chemical resistance.

Beckry Top 100% UV

A 100% solids, UV curable pigmented coating formulated for rollcoat application. Beckry Top is available in a special optiroller quality, which can be applied up to a maximum of 15 g/m².

Beckry Fill 100% UV

The Beckry Fill is a one component, UV-curing filler available in clear or pigmented qualities. With modern filling techniques and Beckry Fill, excellent appearance results can be obtained even with lower grades of particle board.

Beckry Prime 100% UV

Beckry Prime is a pigmented primer with good hiding power, designed for roller application. A special optiroller quality is available, which produces smooth surfaces even when applied more thickly.
