Becker Acroma

Clear Conversion Varnish Topcoats

Post catalyzed clear conversion varnishes from Becker Acroma are known for their unique appearance and easy application properties. With excellent clarity, these two-component non-yellowing finishes help create a beautiful and lasting appearance for a variety of end-uses. The extremely high solids enhance durability and provide a unique, smooth to the touch feel. Becker Acroma conversion varnishes can be applied as self seal or in combination with our post catalyzed sealers for a beautiful, close to the grain finish.

Amerivar™ Post Catalyzed Clear Topcoat – DM5361

A two-component clear coating with high build properties, the Amerivar Clear is non-yellowing and suitable for self-sealing over all shades of stains and woods, even pastels and whites. Highly process efficient with fast dry and cure times and good sag resistance, the Amerivar was designed for vertical or flat spray application. Amerivar Clear meets KCMA specifications, and has lower HAPs to help finishers meet regulatory guidelines.

- Fast Curing Time / Stacks Quickly
- Good Sag Resistance
- Formulated for Vertical Spray Application
- Non-Yellowing

Innovat™ Post Catalyzed Conversion Varnish Clear Topcoat – DM5329

A two-component conversion varnish known for extremely high solids at the gun tip, Innovat is one of the fastest building products on the market. Self-sealing with a very smooth feel, Innovat is non-yellowing and has excellent clarity. An extremely tough and durable finish with outstanding moisture and chemical resistance, Innovat easily meets KCMA test specifications.

- Extremely High Solids
- Fast Building
- Soft Silky Feel
- Non-Yellowing

Euroclear™ Post Catalyzed Conversion Varnish Clear Topcoat – DM5319

A two-component conversion varnish, Euroclear is designed to provide extreme durability and excellent clarity. With very high solids, Euroclear has excellent self-sealing properties

to create a beautiful, close to the grain finish. Euroclear has exceptional non-yellowing characteristics, and is HAPs-free for easier regulatory compliance.

- Extremely Durable
- Excellent Clarity
- Beautiful Close to the Grain Look
- Non-Yellowing

Uniclear™ Post Catalyzed Conversion Varnish Clear Topcoat – DM5315

Exceptionally tough, Uniclear has high solids for outstanding durability without sacrificing clarity or the close-to-the-grain appearance. It can be used as a self-sealing system with excellent results, and meets all KCMA test specifications.

- Exceptionally Tough Finish
- Excellent Clarity
- Beautiful Close to the Grain Look
- Non-Yellowing
