Pigmented Conversion Varnish Systems

Becker Acroma

Pigmented Conversion Varnish Systems

Widely recognized as the industry leader for post catalyzed pigmented systems, Becker Acroma products are designed for durability, without sacrificing aesthetics. Extremely user-friendly, Matador can be applied as a self-seal system or combined with the Bernyl Surfacer to create finish systems that are unmatched in appearance on a wide range of wood substrates. The outstanding flow of the applied product and the resultant smooth feel of the finish coat is unique among pigmented enamels.

Matador™ Pigmented Conversion Varnish – DH560001X

Matador has the highest solids content of pigmented conversion varnishes on the market today, for a high-hide finish with an exceptionally smooth feel. Matador will cover minor sand-throughs with one coat, making it a very user friendly product to apply. Formulated to achieve coverage in one or two coats over Bernyl Surfacer or Bernyl Unisurfacer white primers, Matador is an excellent choice for the full range of wood substrates. Matador is also available in a tint base DH56000XX.

- Extremely High Solids
- Can be tinted
- Quick Curing
- Smooth Finish

Bernyl™ Surfacer Post Catalyzed White Primer – DF5350

A post catalyzed primer with extremely fast drying and curing properties, the Bernyl Surfacer White has excellent sanding properties and is suitable for interior furniture and millwork wood surfaces. It also has extremely high solids, providing good filling properties and superb hiding in one coat.

Bernyl™ Unisurfacer Post Catalyzed White Primer – DF5354

Ideal for wood, wood-substrates, HDF and MDF, the Bernyl Unisurfacer is specially formulated for use over MDF. Combined with the Matador topcoat, it provides a finish that surpasses traditional pigmented systems. Bernyl Unisurfacer White works well with “Fladder Sanding” as well as other machine or hand sanding. The coverage of this primer is excellent, with outstanding topcoat hold-out.

Bernyl™ Transparent Surfacer – DF5300

Extremely good for priming or sealing MDF, the Bernyl Transparent Surfacer has filling properties that are among the best in the industry. As the first coat on MDF, Bernyl Transparent Surfacer will give very good adhesion to the substrate that is an excellent foundation for high quality finishing. For best results, use the full Becker Acroma Matador-system: Bernyl Transparent Surfacer, Bernyl Surfacer White and Matador.
