Becker Acroma

Becker Acroma

Post Catalyzed Clear Sealers

Known for their fast drying and excellent sandability characteristics, Becker Acroma provides an optimal foundation for our offering of post catalyzed topcoats. These two component sealers are easy to apply and enhance the final appearance of the wood. Easy to apply, Becker Acroma post catalyzed sealers are suitable for a wide variety of substrates, including wood, veneers, and MDF.

Care™ Seal Post Catalyzed Clear Sealer – FF5310

A two-component solventborne sealer, Care Seal is an excellent foundation for most Becker Acroma acid cure clear coats. Care Seal reduces the risk of oily imperfections in the finish by not rewetting the stain on most wood substrates. This sealer also reduces the natural yellowing of the wood substrate with UV asborbers added for additional finish protection.

- Excellent Sandability
- Reduces the Risk of Oily Imperfections
- Fast Drying

Care™ Seal HS Post Catalyzed Clear Sealer – FF5320

A high solids, HAPs-free two-component sealer suitable for most wood substrates, Case Seal is an excellent base for most Becker Acroma acid cure clear coats. Care Seal HS provides excellent build on vertical spray applications.

- High Solids
- Excellent Sandability
- Superior Vertical Spray Properties
- Very Good Light Stability
- Fast Drying
