Post Catalyzed Clear Topcoats

Becker Acroma

# Becker Acroma

## Post Catalyzed Clear Topcoats

Post catalyzed clear topcoats from Becker Acroma are durable finishes for use on the full range of wood products, including joinery, kitchen & bath cabinetry, millwork, and most other wood & veneer substrates. Becker Acroma finishes have a very smooth to the touch feel. These topcoats can be used for self-sealing, or paired with post catalyzed sealers for a range of finish line options.

### **Bernyl™ Fiesta Post Catalyzed Clear Topcoat – DM5340**

A two-component clear coating, Bernyl Fiesta brings out the natural patina and beauty of wood. Highly process efficient, Bernyl Fiesta builds quickly, has good sag resistance without sacrificing flow and leveling, sands easily, and has exceptionally fast drying properties. With excellent durability, Bernyl Fiesta meets KCMA specifications and provides very good chemical and scratch resistance.

- Brings out the Natural Beauty of Wood
- Fast Curing Time / Stacks Quickly
- Fast Build
- Excellent Flow and Leveling
- HAPs-Free

### **Bernyl™ Reliant Post Catalyzed Clear Topcoat – DM5342**

Bringing out the natural patina and beauty of wood, Bernyl Reliant has all the same product features as Bernyl Fiesta with even better chemical and scratch resistance.

- Brings out the Natural Beauty of Wood
- Excellent Chemical and Scratch Resistance
- Builds Quickly / Sands Easily
- Excellent Flow and Leveling
- Good Sag Resistance
- Low HAPs
