Pre-Catalyzed Clear Topcoats

Becker Acroma

# Becker Acroma

## Pre-Catalyzed Clear Topcoats

Pre-catalyzed clear topcoats from Becker Acroma provide finishing solutions for a range of end-uses. With excellent ease of application, these one-component systems offer the benefit of process flexibility and built-in hardeners that provide long pot-life. Helping finishers create a beautiful but durable finish, Becker Acroma pre-catalyzed topcoats give a lustrous appearance that enhances the natural beauty of most interior wood surfaces.

### **Bernyl™ Intro Pre-Catalyzed Clear Topcoat – NM5202**

A one-component clear coating for natural or stained interior wood surfaces, the Bernyl Intro is pre-catalyzed and pre-reduced for easy application. A self-sealing product, it has excellent sanding properties and short dry and cure times for process efficiency gains. The Bernyl Intro does not contain phthalate plasticizers, ketones or methanol.

- Easy to Apply
- Self-Sealing
- High Solids
- Excellent Sanding

### **Bernyl™ Facett LV HAPs Free Pre-Catalyzed Clear Topcoat – NM5212**

A clear coating for natural or stained woods, Bernyl Facett LV HAPs-Free is a self-sealing, high solids system that provides excellent build and depth for most interior wood surfaces. Bernyl Facett has good chemical and scratch resistance properties for overall durability, and helps finishers be more efficient with a delivered viscosity that is the same as the suggested application viscosity.

- Easy to Apply
- Excellent Build and Depth
- Good Chemical and Scratch Resistance
- Self-Sealing
