Becker Acroma

UVETT™

UV for Rollcoat Applications

A global leader in UV technology, Becker Acroma has an extensive range of UV finishes to meet the needs of industrial wood finishers. Our line of UVETT topcoats and sealers is designed specifically for rollcoat application, providing the optimal characteristics for that unique type of finish process. Backed by our global technical breadth and extensive experience with UV finishing, you can rely on Becker Acroma to deliver the innovative technologies you need.

Becker Acroma UVETT Sealer

A one-component UV-cured sealer formulated specifically for rollcoat application, this 100% solids formulation provides excellent grain fill with easy sandability properties. When used with UVETT Ultimo Topcoat, the system provides an outstanding, solvent-free finish.

Becker Acroma UVETT Ultimo Topcoat

UVETT Ultimo is a clear UV-cured finish suitable for a range of interior wood products, including office furniture and joinery, kitchen and bath cabinetry, and millwork. UVETT Ultimo provides an extremely smooth finish that feels silky to the touch, with exceptional scratch and chemical resistance. The extremely fast cure times makes this product an optimal choice for rollcoat applications.

- Solvent Free Finish System, HAPs-Free
- Excellent Fill and Easy to Sand
- Outstanding Scratch and Chemical Resistance
- Silky Smooth Topcoat Finish
- Suitable on Veneer and Solid Woods
- Formaldehyde Hazard Free
